

Core Facility User Safety

In order to conform to safety standards required by law, UCLA Environmental Health and Safety (EHS) requires that each user and the principal investigator of the Integrated NanoMaterials Laboratory (INML) certifies the following:

1. User has been instructed regarding safety procedures in the CNSI Core Facility in which he or she will be working.
2. User is aware of specific safety requirements and location of the safety equipment, first aid kit, safety folder including MSDs, eyewash station, operation manuals and other tools/materials/equipment essential for safety.
3. User understands that it is the user's and his or her principal investigator's responsibility to obtain and keep all necessary safety and other trainings, certificates, records, individual safety equipment etc. required by the law, UCLA safety administration and the CNSI Core Facility in which he or she is working. User will also present such records to CNSI Core Facilities directors or managers and EHS personnel upon request as needed. User may not enter facility if he or she has not completely fulfilled and conformed to all safety requirements.
4. User will exert all possible efforts to comply with safety requirements when in the CNSI Core Facility laboratories.
